How Omdia Helps You

- Strengthen your positioning within industry cost competitiveness
- Gain insights into the supply chain landscape to identify opportunities for new efficiencies and cost reduction
- Better understand the competition's cost structure and product, pricing, supply chain and technology strategies

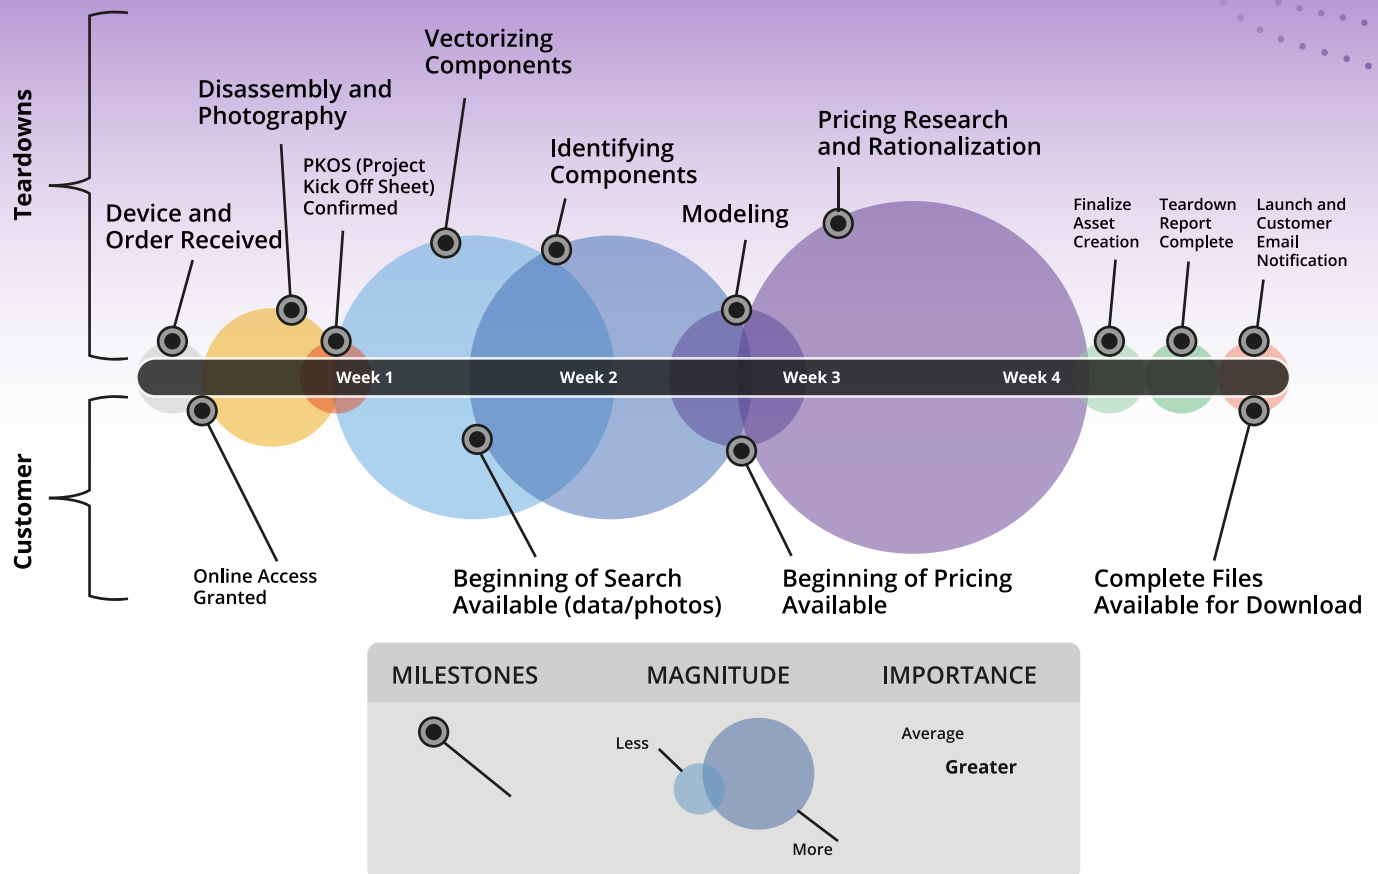

Key Questions Answered

- How do competitors' designs compare with mine? Are they more cost effective or provide better capabilities for the price?
- Where can we improve our designs to better compete at the lowest cost?
- How does the total cost of ownership compare between our products and those of competitors?
- How do the margins on our products compare to the competition?

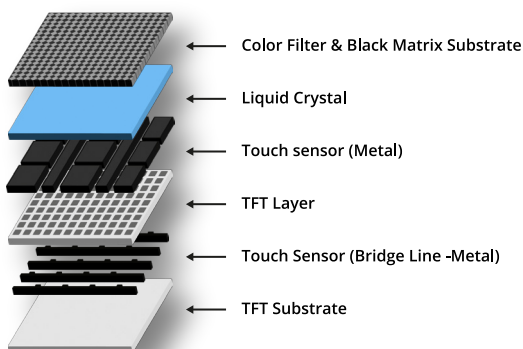

Omdia's Teardown Service provides you with a complete picture of how your competitors are seeking to win in the market by allowing you to benchmark their product designs and costs against your own.

Omdia's Teardown Service has tackled projects ranging in scope from smartphones, wearables, tablets/PCs, and edge servers to 5G antennae, automotive ECUs, and industrial equipment. The Teardown Service provides you with detailed component bills of material and analysis.
